security information	
security information	Siemens provides products and solutions with industrial security
	functions that support the secure operation of plants, solutions,
	machines, equipment and/or networks. They are important components in a holistic industrial security concept. With this in mind, Siemens'
	products and solutions undergo continuous development. Siemens
	recommends strongly that you regularly check for product updates. For
	the secure operation of Siemens products and solutions, it is necessary to take suitable preventive action(e.g. cell protection concept) and
	integrate each component into a holistic, state-of-the-art industrial
	security concept. Third-party products that may be in use should also be
	considered. For more information about industrial security, visit
	http://www.siemens.com/industrialsecurity. To stay informed about product updates as they occur, sign up for a product-specific newsletter.
